

2018 Farm Bill Summary of Organic Programs and Priorities

The Organic Trade Association’s Farm Bill platform calls for full support and adequate funding for the USDA National Organic Program (NOP) to keep pace with industry growth, set uniform standards, and carry out compliance and enforcement actions in the U.S. and abroad. It advocates for organic-focused research, risk management tools, data collection and direct dialog between industry and USDA that are critical to organic farmers’ success. It calls for improved access to land and capital, investment in distribution systems and infrastructure, and targeted technical assistance through the utilization of existing USDA conservation, rural development, and other programs to encourage orderly transition to organic. Organic is a very small piece of the larger farm bill, but those core programs we have are important to maintain. Our goal is to build on the programs that address the unique needs of organic, and to make the kind of progress that represents the tremendous growth in the organic industry. The Organic Trade Association is actively advocating for, and tracking progress on, policies that promote a healthy organic marketplace, ensure that organic farmers continue to be successful, and ultimately expand organic production. This side-by-side shows how our priorities are faring as the House and Senate bills advance.

CURRENT STATE OF PLAY:

- April 12, 2018:** House releases draft Farm Bill
- April 18, 2018:** House Farm Bill approved and passed out of House Agriculture Committee
- June 8, 2018:** Release of Senate draft Farm Bill
- June 13, 2018:** Senate Farm Bill approved and passed out of the Senate Agriculture Committee
- June 21, 2018:** House Farm Bill passes on House floor
- June 28, 2018:** Senate Farm Bill passes on Senate floor
- September 30, 2018:** Current Farm Bill expires

What’s Next? The House and Senate will conduct a Conference Committee to work out differences between the two bills and report a final Farm Bill.

	PROGRAM	2014 FARM BILL	OTA 2018 FARM BILL REQUEST	HOUSE BILL	SENATE BILL
  	National Organic Program	\$15 million per year (authorization for appropriations)	FY19–\$16.5 million FY20–\$18 million FY21–\$20 million FY22–\$22 million FY23–\$24 million	FY19–\$16.5 million FY20–\$18 million FY21–\$20 million FY22–\$22 million FY23–\$24 million	FY19–\$16.5 million FY20–\$18 million FY21–\$20 million FY22–\$22 million FY23–\$24 million
	Organic Agriculture Research and Extension Initiative	\$20 million per year (mandatory funding)	Increased funding to achieve baseline of \$50 million per year by 2023	\$30 million per year This is the first increase for OREI in a decade. It was the only program in the entire research title to receive an increase in funding.	FY19–\$40 million FY20–\$40 million FY21–\$45 million FY22–\$50 million FY23–\$50 million This is the largest increase in OREI funding ever. It achieves permanent baseline funding for the program.
	Organic Production and Market Data Initiatives	\$5 million (mandatory funding)	\$5 million	\$5 million	\$5 million
